HIGHLIGHTS FROM THIS YEAR'S COLLECTION

GRILL

Have your backyard barbeque experience wherever you want it. By making the Kuchoma grill light and compact, carrying it along to your favorite sites will be easy and convenient. The design is optimized to be as small and light as possible without compromising on neither performance nor functionality that you'll need for an unforgettable barbecue with friends and family. *Find out more on page 22*.

Kuchoma Grill

KUCHOMA LAUNCH CAMPAIGN

Get a Tongs for free with your Kuchoma!

- for end-consumers
- only as a Pre-Order until 31.12.2017
- For delivery in April & May
- Tongs will be packed together with the grill
- Special article nr: 440051

A pair of tongs made of stainless knife steel, which is sturdy yet, flexible and will give you great control at the grill. The cutout pattern gives you a great grip even when tongs are wet or greasy.

CAMPFIRE APRON

Protect your clothes from grease and soot while showing off for your friends in style. Made from durable g1000-fabric.

COOLER

The Cooler is an insulated variant of our Utility Sack, perfect for the smaller adventure or to be stowed in your backpack. Fill it with ice or use the Ice Pack to keep your food or beverage cold. *Find out more on pages 62-63*.

ACCESSORIES

Eating outdoors has never been easier. And with our new accessories we've made it even more convenient! Our smart, multifunctional design means you can travel light and eat well. *Find out more on pages 47-61.*

Find out more on page 47.

VACUUM TUMBLER

Isolated mug made of stainless steel with plastic lid. Choose between three different colours - stainless steel, black and blue.

CAMPFIRE PLATE LIGHTWEIGHT

Light plate made of transparent Tritan®, perfect for the picnic. Comes in red and black.

TODAY WE SUMMER

To some summer is those few longingly anticipated months, from June through August, where the sun peaks and nature flourishes into its full glory. But to us, who see things a little different, who know a little better, we quite simply think this - what a waste, summer can be more, summer knows no limits, come rain or snow summer is a year round state-of-mind.

Off with the gloves on with the grill. Skewer those tomatoes, char those zucchini slices, scorch those hotdogs and pass the ketchup. Good food, good friends, good stories. Laughter, larking, frolicking. Wide open spaces, the great outdoors, and picnics. That's the spirit of summer, and that's where we started with our inspiration for this years CampFire range.

Easy to handle, easier to transport, compact yet more than ample to grill-up summer enough for everyone, whatever the weather, whenever the mood takes them. That was our ambition and why our latest Kuchoma stove features a grilling surface that provides both direct and indirect heat, and why we've made it to run on our lightest gas fuels, the ones usually reserved for our backpacking stoves.

But a stove alone doesn't make a picnic which is why Kuchoma is complemented by a range of accessories. From insulated cooler backpacks, to vacuum tumblers and lightweight stools, these are what make CampFire occasions possible any time.

CAMPFIRE

Our Campfire range is especially designed with adventures of a smaller nature in mind. From woodland forage to beachside BBQ, these are stoves that bring culinary delight to the great outdoors.

Light enough to carry in one-hand. Compact enough to fit in a kayak Space enough to feed family and friends

TREKKING

Engineered for those adventurers with a bit more of an ambitious step in their foot. Our fuel efficient Trekking range ensures freshbrewed coffee and good, hot meals however long your road is.

Low in consumption, high in efficiency Small and light in your backpack. Safe, clean, soot-free fuelled meals for weary feet.

EXPEDITION

Designed for serious adventures across extreme conditions our Expedition range takes pride in reliability. Quality without compromise these are easy to run, easy to maintain stoves that ensure hot and adventure sustaining food is always close at hand.

Easy to use, easy to maintain Suitable for extremes (hot + cold) Hard to break Built for gas and liquid fuels Adventure sustaining food without fail

EXPLORE WHATEVER YOUR ADVENTURE

Because, big or small, food is the fuel of every great adventure we've engineered stoves to suit all needs.

> * This symbol helps you decide which stove is right for your adventure.

MORE THAN 125 YEARS OF SUCCESS

From Stockholm 1892, via North and South Poles, across deserts, Everest, The Himalayas and K2. Through continuous innovations, award-winning firsts and environmental consciousness to TODAY, where the Freedom to explore continues.

1892

The partners F.W. Lindqvist and J.V. Svensony produce the first soot-free kerosene stove and call it 'Primus'.

1897

The Andrée expedition packs a Primus stove and attempts to reach the North Pole.

LATE 19TH C

Primus gets a logo.

1908

The Lilla Essingen Primus factory opens.

1911

Roald Amundsen takes a Primus stove and heads South to the Pole.

1930s

Primus stoves are readied for adventure.

1930^s-1950^s

Primus develope LPG stoves, LPG lanterns and LPG cylinders.

1950

Primus production begins in Hagfors.

1953

Sir Edmund Hillary anTenzing Norgay become the first to reach the summit of Mount Everest. They prepare their food on a Primus stove.

1960

The Primus logo gets its oval shape.

1978

Primus start its environmental work by developing gas burners for African countries to reduce the amount of wood used for cooking.

1995

A new Primus factory in Tartu, Estonia, is opened.

1996

Primus welcome MultiFuel - the first stove that can run on LP gas, whitegas, kerosene and even aviation fuel. It's tested by Göran Kropp on Mount Everest.

2006

Primus launches PrimeTech - stoves with efficiency rates that are double conventional stoves.

2011

Primus launches the awardwinning multifuel stove OmniLite Ti.

2013

Thanks to a new patented burning technology, Primus launch Lite, our smallest complete stove system ever.

PRIMUS

2014–2016
The first new Primus logo in 50 years is launched alongside wintergas, and followed-up by the CampFire range.

2017

Award-winning Primus Primetech stove sets arrive as the first regulated hose stove sets for all round year use.

PRODUCTION AND QUALITY CONTROL THE PRIMUS STOVE: INVENTED IN SWEDEN, MADE IN EUROPE

Designing greatness. We know that you demand products of the highest quality. Equipment you can rely on even during extreme conditions; essentials that will last you a lifetime of adventures. That's why we keep reinvesting into our in-house research and development. And that's how we are able to keep pushing the standards for outdoor cooking, year after year.

Everything starts in the test lab of

Primus' headquarter in Solna, Stockholm. At our R&D team's playground you'll find tons of instruments, tools and various simulators to help our engineers construct and test new prototypes in all kinds of conditions. Every design has to undergo the same rigorous testing, resulting in as many number of laps back to the drawing board as it takes to perfect the design. And that's before any prototype ever sees live testing in the fields.

MANUFACTURING DURABILITY

Back in 1995 we moved stove production to our neighbor con

production to our neighbor country across the Baltic Sea: Estonia. The short distance from Stockholm, ease of quality control and a historical tradition of crafts-

manship, were all major factors in our decision. Today our factory in Tartu employs 22 skilled workers. Every single stove passes through three pairs of hands before final assembly is done. And our expedition and trekking stoves, as well as our gas lanterns, also have to withstand a final test before they leave the factory: we check them for leaks and light them up to ensure they burn with an optimal flame. This means there may appear a few tarnishes around the burner of your new Primus stove. These marks are our assurance to the user that their new stove is in perfect working order, ready for years of reliable, safe service.

PRIMUS EXPEDITION SERVICE: STOVES MADE FOR LIFE

For over 120 years our products have been tested and trusted in the harshest of environments. We take great pride in ensuring all our products meet superior quality and that they will, with the proper maintenance, provide years and years of service. That's why we are introducing Primus Expedition Service, applicable to any expedition stove (OmniLite TI, OmniFuel and MultiFuel) sold from 2015 onwards. In the unlikely event the stove should fail due to defective materials or construction, we will help the original owner by sending spare parts, repair the stove or replace it – free of charge.

See www.primus.eu/expeditionservice for a more extensive description and terms and conditions.

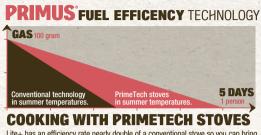

THE SECRET BEHIND PRIMUS FUEL EFFICIENCY TECHNOLOGY

40 percent, that's the efficiency rate for a conventional stove. Literally that means that more than half of your energy disappears into nothing.

 All of us who spend time in the great outdoors have one thing in common: we want hot meals as quickly and smoothly as possible, says Eric Svartström, Head of R&D at Primus.

Primus fuel efficient PrimeTech stoves gives an efficiency rate that's nearly doubled compared to a conventional stove. So choosing a PrimeTech stove means:

- 1. You can bring less fuel with you.
- 2. Less fuel is good for your purse, your back and the environment.
- 3. Your food will heat up/boil faster.

Lite+ has an efficiency rate nearly double of a conventional stove so you can bring less fuel or stay out longer.

100 grams LP gas lasts for roughly one hour of continuous cooking, depending on depending on altitude, weather conditions and temperature of the water used. That translates to the cooking of every lunch and dinner, as well as the brewing of breakfast and afternoon coffee or tea, for one person during a five day adventure – twice the efficiency you'll get from a conventional stove!

FIND YOUR FAVORITE AND YOU'LL HAVE A FRIEND FOR LIFE

Eric Svartström again:

– During the development of the super efficient stoves, we went back to the drawing board and reviewed every aspect of the stove: How do we make the burner, the windshield and the pot work optimally together? How do we get your LP gas to last almost twice as long, by reducing heat loss and heat-up time?

Primus solved the challenges. Every PrimeTech stove now offers you an unsurpassed user experience for a long time onwards, at a maximized efficiency rate and at a

minimal environmental impact.

Have a nice, long trip!

- Eric Svartström, Head of R&D

The secret that enables a PrimeTech stove to achieve an efficiency rate close to 80 percent, is a combination of:

- 1. The burner is optimized for the new generation fuel-efficient pots with heat exchangers.
- 2. The windshield that protects the flame.
- 3. The pot has a built-in heat exchanger that absorbs the heat better than a conventional pot.

The yellow/red parts show areas where heat goes up past the sides of the pot rather than going in to the pot.

Significantly less heatloss with this technology.

MOTHER NATURE WILL ALWAYS SURVIVE

Mother nature will always survive in one way or another, but if our generation continues to drain the nature, coming generations will surely have trouble to enjoy it as we are able to do.

Our existence as an outdoor brand – and as individuals who constantly thirst for new outdoor experiences – is closely linked to our environmental awareness.

– We seek to make more efficient use of resources in everything we do, to find more environmentally friendly alternatives and to make our company as close to one hundred percent climate neutral as possible. If we don't, we won't have any adventures to go out to, says Lars-Ola Brolinson, CEO at Primus.

PRIMUS LOGO - A RELIABLE FRIEND

When you see the Primus logo on a product, you can take this as a guarantee that it has been made to be a reliable friend that will stand regular use for many, many years.

– It's about reducing our need for raw materials, the energy we use in production, how we transport our products and the way we package them. And last but not least, to boost efficiency in order to decrease fuel consumption, says Lars-Ola Brolinson.

Primus PrimeTech stoves with fuel efficiency technology have an efficiency rate of 80 percent, which means they are almost twice as fuel efficient as conventional outdoor stoves. This not only reduces the amount of CO2 emissions from the stove but also emissions related to the production and transport of the fuel.

REPLACEABLE AND RECYCLABLE PARTS

The majority of Primus products have replaceable parts and Primus continue to stock spare parts for old products, you can always replace worn components and further extend the life of your stove. If, against all odds, your Primus product were to be damaged beyond repair, its component parts can be recycled to produce new products.

FSC CERTIFIED AND RECYCLED

About half of our packaging is FSC certified. That means that the whole manufacturing process and the material is fully traceable and done according to strict standards. The remaining half of the packaging is made from recycled paper.

A CARBON DIOXIDE NEUTRAL FUEL

Primus gas is a carbon dioxide neutral fuel. To compensate for the carbon dioxide emissions from the gas and the metal cartridge, we support a project that helps households in Uganda, one of the poorest countries in the world, to go greener.

By subsidizing and making fuel-efficient stoves accessible for everyone, inefficient firewood or charcoal stoves are replaced and the emission of greenhouse gas is reduced by 1.5 ton of CO2 per stove per year. The high rate of deforestation is lowered, which can prevent draughts and floods. Families benefit from cleaner indoor air and lower energy costs. Less time for collection firewood is needed, which allows girls to go to school and women to pursue income-generating activities.

KUCHOMA LAUNCH CAMPAIGN

Find out more on pages 6

- Portable
- Easy to maintain
- Light and compact

Have your backyard barbeque experience wherever you want it. By making the Kuchoma grill light and

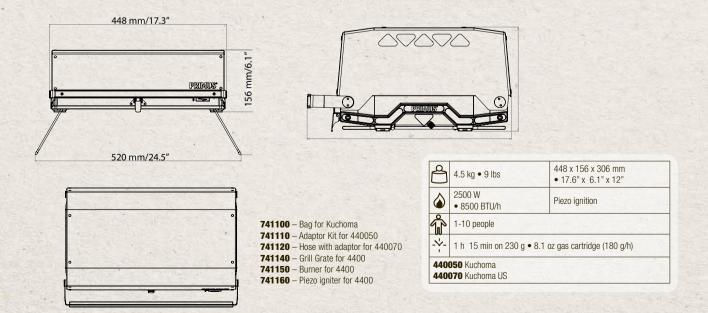

compact, carrying it along to your favorite sites will be easy and convenient. The design is optimized to be as small and light as possible without compromising on neither performance nor functionality that you'll need for an unforgettable barbecue with friends and family.

The Kuchoma grill will give both direct heat as well as indirect heat to cook your food exactly how you like it best. The grill grate with a non-stick surface and the drip tray can be removed and cleaned individually which makes the grill easy to maintain.

To further increase the portability, Kuchoma is powered by the smaller and lighter canisters normally used for backpacking stoves - Primus canister gas 100 g, 230 g and 450 g. The 440070 Kuchoma (US) for the North American market is powered by the 16.4 -oz. propane cylinder.

For the 440050 Kuchoma for the European markets, the additional 741110 Adaptor kit can convert the grill to run on Primus 2012 cylinders and refillable cylinders with M16 x 1,5 (CG), AG KLF (G12) also called DIN Kombi, 16.4 -oz. propane cylinder and P.O.L connections.

For 440070 Kuchoma (US) for the North American market, the additional 738019 Adaptor kit be bought in order to convert the grill to run on following connections; Primus 2012 cylinders and refillable cylinders with M16 x 1,5 (CG), AG KLF (G12) which is also called DIN Kombi. And if you would like to run your 440070 Kuchoma (US) on tanks and cylinders with P.O.L connections, the 1,5 m/5 FT long, 741120 Hose with adaptor can be used.

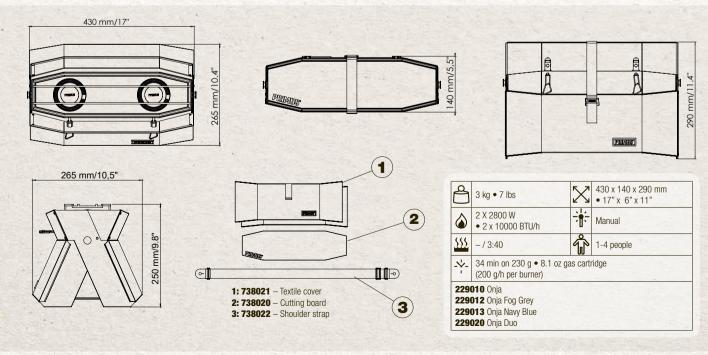

Portable

Suitable for large pots

Simple to carry and set up

FOR CULINARY ADVENTURES

Onja is our most compact two-burner stove. Thanks to the carrying strap the stove is easy to bring along and functions just as well on the city excursion to the park as on the weekend trip with the kayak. When extended the body becomes a stable cooking unit that also protects the burners from the wind. The top is covered with an oak lid that doubles as a cutting board or as a plate to serve food on. Powered by Primus 100 g, 230 g or 450 g canister gas. There is also a Duo valve version that fits most gas cartridges with a valve on the market, perfect for those who bring the stove with them when travelling.

- Suitable for larger parties
- Light and compact
- Easy to maintain

475mm / 18.7"

KINJIA

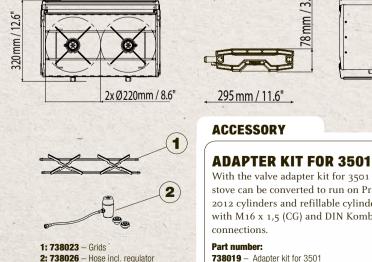

3: 738025 - Bag

FOR DEMANDING CAMPSITE CHEFS

Designed to be carried along, this stove will deliver a real cooking experience for friends and family. Lighter, smaller and more compact than most two burner stoves and without compromising performance or capacity, Kinjia will not let the outdoor chef down. To further increase the portability this stove is powered by the smaller and lighter canister normally used for backpacking stoves - Primus canister gas 100 g, 230 g and 450 g. The 350111 Kinjia (US) for the North American market is powered by the 16.4-oz. propane cylinder. The grids and the drip tray are easily removed and can be cleaned individually making the stove easy to maintain. Made from solid materials and its robust design will ensure years of reliable service.

With the additional 738019 Adapter kit for 3501 the stove can be converted to run on Primus 2012 cylinders and refillable cylinders with M16 x 1,5 (CG) and DIN Kombi connections.

Kinjia can also be equipped with the additional 738018 CampFire Griddle Plate.

475mm / 18.7"

- Designed for large pots and pans
- Light and compact
- Side windscreens

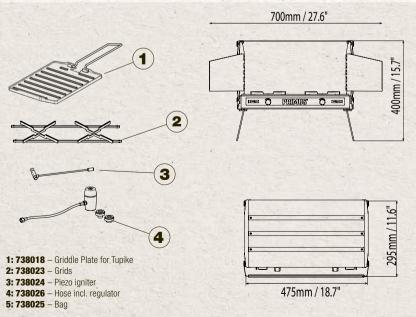

TUPIKE

FOR THE DEVOTED CAMPSITE CHEF

It's hard to beat the taste of an outdoor meal. But cooking up a feast for friends and family in the outdoors usually means hauling along bulky and heavy equipment. Well, not any more. Tupike Two Burner Stove has capacity for real cooking yet its light and compact enough to easily carry along. With a stainless steel body, oak laths and brass details Idun will age with pride and look better with every adventure. The oak laths give the lid a rigid and robust feeling and protects the stove from wear and tear. When open, the lid and the additional side windscreens ensure steady cooking, even in windy conditions. Tupike comes with a custom griddle plate with a non-stick surface for easy use and cleaning. The griddle plate is made from die-cast aluminium, which ensures a good heat distribution. The stove is powered either by the smaller and lighter canister normally used for backpacking stoves (Primus canister gas 100 g, 230 g and 450 g) or, for more stationary use, the larger Primus 2012 and M16 x 1,5 (CG) cylinders. The 350121 and 350131 Tupike (US) for the North American market is powered by the 16.4-oz. propane cylinder and Primus 100g, 230 g and 450 g gas canisters. Designed to be easy to use and keep clean the grids and the drip tray can be removed and cleaned individually. The solid materials and its robust design ensures years of reliable service

Tupike is also available in a version with a carrying bag, Tupike Kit, which holds both the stove and all the necessities for a good meal. The carrying bag is made from high quality polycotton fabric and has separate pockets for accessories, gas, food or other things needed.

THE ULTIMATE STARTER SET

The Essential Stove Set is the perfect system for someone looking for an affordable and easy to use solution. The simplistic design offers maximum cooking capacity in convenient format.

Since the burner is integrated in the windscreen setting up the stove is literally as easy as 1-2-3. Take out the windscreen from the pot, connect the gas canister and light it up! For added safety the patented burner features a design that prevent accidental flare-ups in the event should the canister fall over. The windscreen makes a stable base and protects the flame from the wind.

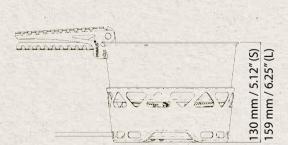

The Essential Stove Sets consist of:

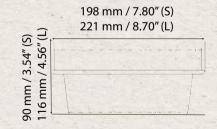

- · Windscreen with integrated burner
- Two aluminum pots that packs in each other
- · A frying pan with non-stick coating that doubles as a lid.
- A pot gripper

The Essential Stove Sets are available in two sizes. Stove Set 1.3L With two 1.3 L pots, suitable for 1-3 people and Stove Set 2.3L with two 2.3 L pots suitable for 2-5 people.

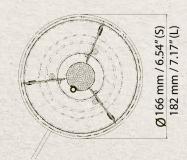

The Essential Stove Sets are compatible with most pots and pans on the market.

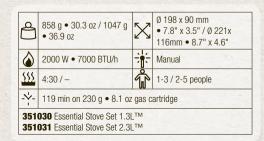

Spare parts: 740690 – Jet nipple **732440** – O-ring **731760** – Pot gripper

PRIMETECH STOVE SET

PERFORMANCE FIRST

The PrimeTech Stove Set is the ultimate solution for performance-oriented trekkers. Thanks to an effective windscreen and a pot with integrated heat exchanger fuel consumption is cut in half compared to a conventional stove. A regulated valve gives a consistent power output and improves performance when when the gas canister is low on fuel or cold. For added safety the patented burner also features a design that prevents accidental flare-ups in the event should the canister fall over. Since the burner is integrated in the windscreen setting up the stove is literally as easy as 1-2-3. Take out the windscreen from the pot, connect the gas canister and light it up! During transport all parts packs up neatly in the pot making it a compact, rattle free unit. The second included pot is made in hard anodized aluminum and has a traditional design without heat exchanger.

The PrimeTech Stove Set consists of:

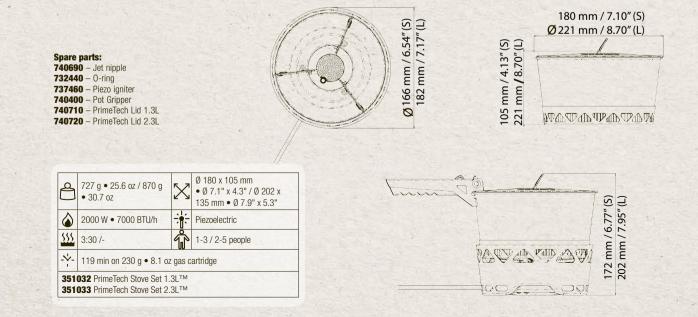

- · Windscreen with integrated burner
- One PrimeTech pot with ceramic non-stick coating
- One regular aluminum pot
- · A lid with integrated colander
- A lockable pot gripper
- A piezo igniter
- · An insulated storage bag

The PrimeTech Stove Sets are available in two sizes. Stove Set 1.3L With two 1.3 L pots, suitable for 1-3 people and Stove Set 2.3L with two 2.3 L pots suitable for 2-5 people.

The PrimeTech Stove Set are compatible with most pots and pans on the market.

- Perfect for solo adventures
- Efficient all-in-one stove
- Compact

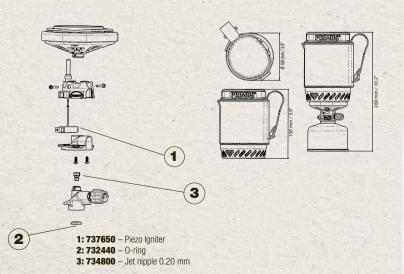

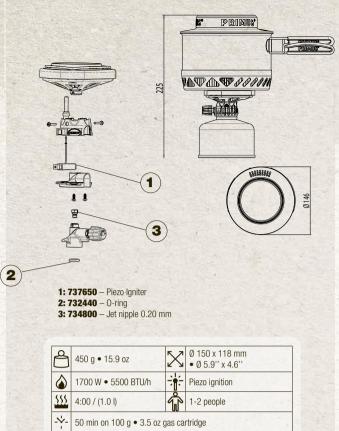

COMPACT ALL-IN-ONE STOVE

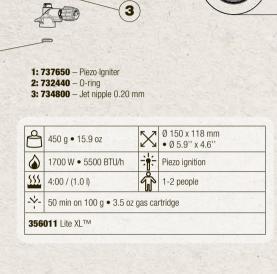

Lite+ sets a new standard for compact all-in-one stoves. The unique locking mechanism (patent pending) makes it very sturdy and thanks to the Laminar Flow Burner Technology (patent pending), the stove has a lower burner than would otherwise be possible, resulting in a more stable, lighter and compact stove. Perfect for the solo trip or a coffee break for two. The stove and all accessories, including a 100-gram gas cartridge, fit into the 500 ml hard anodized aluminium pot. Lite+ comes with a new heat resistant sleeve in durable G-1000 with felt lining. The sleeve also features a webbing handle with the added ability to use the stove hanging. The lid cuts cooking time and keeps all the parts securely in place in your backpack – and can also be used as a mug. Lite+ includes a foot support for added stability on uneven surfaces and a suspending cord. Gas is not included.

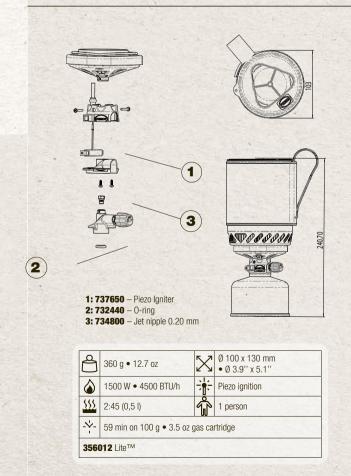

FOR EASY COOKING

The Lite family has a capable version featuring a 1-litre pot, big enough to cook real food for up to two people. Other significant benefits of the Lite family are the unique Triangular Joint Connection (patented) that secures that pot with a twist and the Laminar Flow Burner Technology (patented) that give the burner a very low profile. The 1-litre pot is made of hard-anodized aluminium pot with ceramic non- stick coating. The transparent Tritan® lid has an integrated colander. The Burner, pot, plastic bowl, a 100-gram gas cartridge and the footrest simply pack together in a mesh bag into one compact unit. Gas is not included.

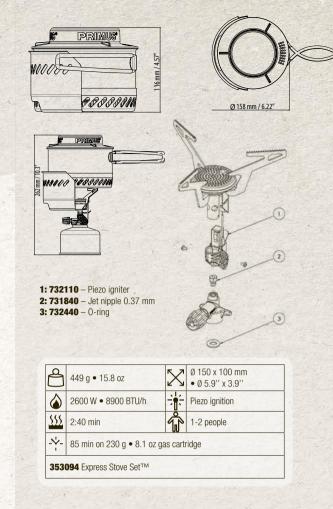

Lite is the entry-level stove in the Primus Lite family, offering simplicity yet the same performance as the rest of the range. The patented attachment of the pot to the stove and patented Laminar Flow Burner Technology provides a stable and efficient cooking experience whenever you need a stove at hand. The pot in combination with the burner makes the stove one of the most efficient of its kind. The stove and all accessories, including a 100-gram gas cartridge, fits into the 500 ml hard anodized aluminium pot. Lite has a insulating felt sleeve ensures easy and safe handling. Gas is not included.

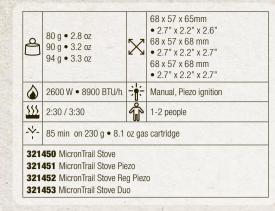

EXPRESS STOVE SET SMALL, LIGHT, AND MINIMAL FUEL

CONSUMPTION FOR SOLO TRIPS

Express Stove Set with its new pot has an effective windscreen that simply clicks onto the stove using powerful magnets. It comes with a 1-litre PrimeTech pot with a heat exchanger and integrated handle. The lid of the pot is made from transparent BPA-free plastic with an integrated colander and grip-friendly silicone. The stove, the included BPA-free plastic bowl and a 100-gram gas cartridge can be packed inside the pot. Gas is not included.

740700 - Piezo igniter **732060** – Jet nipple 0.30 mm 732440 - O-ring

MicronTrail Stove combines low weight and compact format with performance and ruggedness. This powerhouse is so small it will fit in your breast pocket yet bring 1 liter of water to rolling boil in under 3 minutes when using a PrimeTech Pot. A narrow, high-speed flame is more wind resistant and especially suitable for Primus PrimeTech pots.

MICRON TRAIL STOVE

STURDY AND LIGHTWEIGHT

The valve is designed to give precise simmering control and the foldable knob is large enough to keep your hands well away from the flame.

Choose between simplistic MicronTrail without piezo igniter to keep weight at a minimum, MicronTrail with piezo igniter for extra convenience and MicronTrail with regulated valve and piezo ignition for maximum performance.

Piezo igniter offers extra convenience. The regulated valve improves performance when the gas canister is low on fuel or cold.

Comes with a storage bag. Gas is not included.

MIMER/CLASSIC TRAIL SIMPLE. STURDY AND FLEXIBLE

A robust backpacking stove. A tried and proven design that offers years and years of reliable service. The four pot supports give stability and wind protection. Mimer has a wide flame that is ideal for large pots and when frying. The perfect stove for beginners and anyone looking for an uncomplicated and versatile solution. Also available with duovalve. Gas is not included.

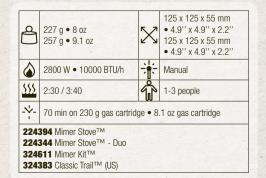

Built-in windshield for fast cooking

POWER TRAIL STOVE FOLDABLE POWER PACKAGE

Our most powerful gas stove is compact yet has power to spare even when cooking for many. Four foldable legs gives stability and the wide flame is good when using large pots and when frying. The valve is designed to give precise simme-

ring control and the foldable knob is large enough to keep your hands well away from the flame.

An integrated piezo igniter offers extra convenien ce. 324415 and 324416 has a regulated valve which improves performance when the gas canister is low on fuel or cold.

Three versions available:

- · PowerTrail with piezo ignition
- · PowerTrail with regulated valve and piezo ignition for maximum performance
- PowerTrail with regulated valve, piezo ignition and duo-valve. The duo-valve version fits most gas cartridges with a valve on the market making this the perfect stove for the global traveler.

The stove comes with a practical storage bag. Gas is not included

PRIMUS

- Powerful
- Stable
- Compact
- Can be upgraded to a multifuel stove

SMALL STOVE FOR BIG POTS

The updated Gravity is the stove for people who want a stable, small stove but still appreciate the simplicity of gas. Thanks to the preheating coil, the stove can also be used during the cold season. With it its new igniter, which also works as a tool, Gravity has become more reliable and robust than ever. The stove has four stable, foldable legs and a wide flame making it suitable for larger pots. The Gravity comes with a windscreen, a heat reflector, an igniter and a nylon storage bag. Gas is not included.

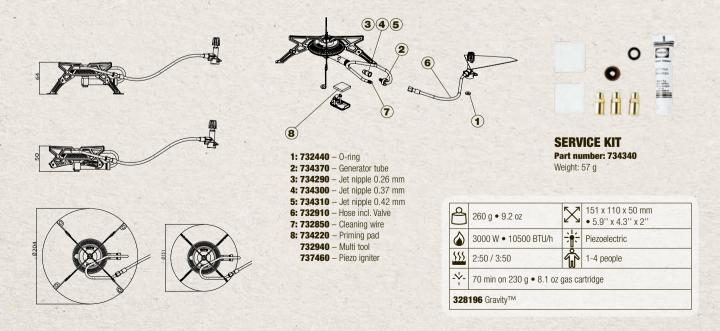

ACCESSORY

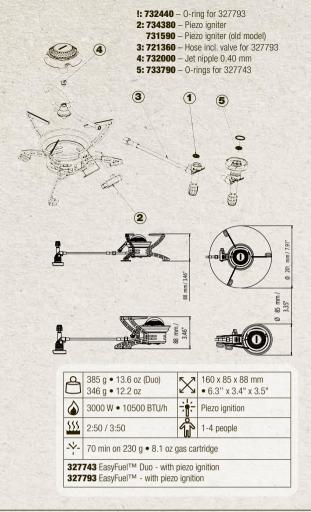

Gravity Multifuel Kit

There is an upgrade for people who already have the gas version of the 328196 Gravity III™, but would also like the option of using liquid fuel, including naphtha fuel and leadfree petrol, and even kerosene in emergencies. The kit has a 0.6-litre fuel bottle, ErgoPump, a multi-tool with a cleaning needle, fuel cup and jet nipples. A practical storage bag is included.

Easy Fuel is all that the name implies - a gas stove that is very easy to use thanks to its sturdy and reliable design, and the fact that it is equipped with a piezo igniter. The version with a Duo valve fits most gas cartridges with a valve on the market. The perfect stove for the global traveler. The Easy Fuel is also available with the standard threaded connection. Comes with a nylon stuff sack. Gas is not included.

- Durable
- Stable
- Available with Duo valve

EXPRESS SPIDER

THE LIGHTWEIGHT ALTERNATIVE TO TOP MOUNTED STOVES

Express Spider is one of the lightest hose-mounted gas stoves available. The upgrades on Express Spider include new pot supports that lock securely in the unfolded position and folds tighter making the stove more compact when stuffed away. The stove offers a low centre of gravity and stability, yet weighing in at only 200 grams it barely ads pack-weight compared to most top mounted stoves. With the optional Multifuel Kit 737500, Express Spider can be converted to run on liquid fuel such as white gas, making it a lightweight fourseason stove. Express Spider comes with a heat reflector and a nylon storage bag. Gas is not included.

"The world's smallest multi-fuel stove: it can burn gas as well as all kinds of liquid fuels from gasoline to diesel. What an ingenious invention!"

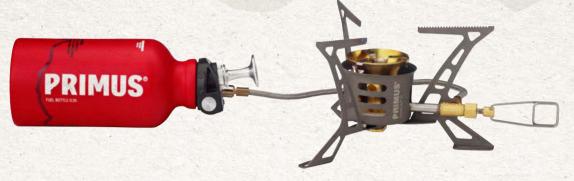

OutDoor Industry Gold Award 2011

OMNILITE TI OUR MOST ADVANCED STOVE EVER

OmniLite Ti is based on the same technology as our award-winning OmniFuel. This stove is just as reliable and robust, but smaller, lighter and much more fuel-efficient. Its output has been adapted for the new generation of fuel-efficient pots with a heat exchanger, like our PrimeTech Pots™. The windscreen and pot supports are made of titanium, making the stove very stable and light. OmniLite Ti works with gas, gasoline/petrol, diesel, kerosene/paraffin, and even aviation fuel. Using the separate control knob, you can adjust the flame to the heat you want, even if you are wearing gloves. The pack size is minimal and the stove is perfect for one or two people heading out on an adventure. ErgoPump™, a multi-tool with a cleaning needle, a foldable windscreen, a heat reflector, a 0.35 l fuel bottle and a convenient and durable storage bag are included (321985).

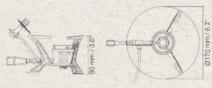

- Lightweight
- Fuel efficient
- Extremely reliable
- Super simmering

ACCESSORY

OmniLite Ti™ Silencer - 737937

Attach this small accessory and listen to the undisturbed sounds of the wilderness - even while cooking! When using LP-gas or white gas OmniLite Ti can be fitted with this silencer that transforms it into a silent stove. The silencer is not suitable when burning diesel,

OMNIFUEL THE COMPANION PROVEN OVER YEARS

OmniFuel is our most award-winning stove ever. It has been tested extensively over many years and has proven itself on countless expeditions. It is extremely robust, reliable and powerful and designed to handle demanding situations, extreme altitudes and both low and high temperatures. The updated OmniFuel is just as capable as before but has a more compact format. The new pot supports (grids) locks securely in the unfolded position and folds tighter making the stove more compact when stuffed away. The jets are clearly marked for each fuel type and attached to the pot supports (grids) so that they are never lost. With 3000 watts OmniFuel has power to spare. Can be used with virtually any kind of fuel, including gas, gasoline/petrol, diesel, kerosene/paraffin – even aviation fuel. The control knob allows you to adjust the flame from simmer to boil, even while wearing gloves. OmniFuel comes with an ErgoPump™, a multi-tool with a cleaning needle, a windscreen and a heat reflector.

- Extremely Powerful
- Extremely reliable
- Super simmering

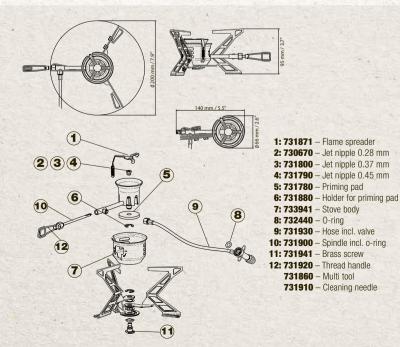

MULTIFUEL THE TRUE WORKHORSE REFINED

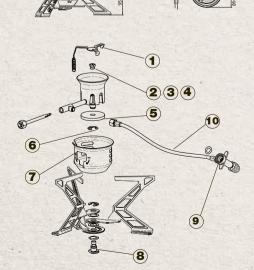

MultiFuel is a sturdy stove that works with gas, gasoline/petrol, diesel, kerosene and even aviation fuel. It produces a powerful flame that works very well even under extreme weather conditions. The new pot supports (grids) locks securely in the unfolded position and folds tighter, making the stove more compact when stuffed away. The jets are clearly marked for each fuel type and attached to the pot supports (grids) so that they are never lost. MultiFuel comes with an ErgoPump™, a multi-tool, a nylon bag, a windscreen and a heat reflector.

KAMOTO OPEN FIRE PIT

Nothing beats the feeling of a campfire - the flickering flames, the sound of wood crackling. However, in many places an open fire is impossible as it would damage the underground. Kamoto is a portable fire pit for no trace campfires. Use it with wood or charcoal.

The frame is made from powder-coated steel, it can be folded and transported easily. Quickly unfolded it is ready to fire up in a few seconds. Kamoto features a stainless steel fire pit with wind protection sides and an air inlet from underneath which gives effective combustion. The ashtray protects the

Kamoto is available in two sizes and comes including a grill grate. It is also the perfect heat source for Primus new OpenFire Pans. The larger version accommodates US standard 16" logs.

Part no:

738060 – Kamoto

Dimensions: 390 x 60 x 530 mm • 15.3" x 2.4" x 20.9"

Weight: 6100 g • 215.2 oz 738061 - Kamoto Large

Dimensions: 470 x 60 x 650 mm • 18.5" x 2.4" x 25.6"

Weight: 7000 g • 246.9 oz

OPEN FIRE PAN

Cooking over an open fire is more than just preparing a hot meal. It's the experience of flames, smell and warmth. The pans have a unique three-layer sandwich material consisting of an aluminum core with stainless steel surface on the top and bottom of the pan. Aluminum has unsurpassed thermal conductivity and cuts weight compared to steel. Stainless steel on the other hand is easy to clean and scratch- and corrosion-resistance. The combination cuts weight with 35 % compared to steel and offers a much better heat distribution than conventional steel pans.

The shape of the pan features a slight depression in the center. The edges are slightly rounded making it easier to flip over pancakes, meat etc. On the sides, two handles allow positioning of the pan on the right spot over the fire. The stainless steel legs are screwed into special lugs that won't clog with fat or soot. The legs themselves have a special thread, which will prevent damages. The rectangular crosscut of the legs gives better grip for mounting and dismounting the legs.

Available in two sizes, 46x59 cm (18.1"x 23.2") and 47x76 cm (18.5"x 29.9").

738050 - OpenFire Pan Small

Dimensions: 460 x 590 x 250 mm • 18.1" x 23.2" x 9.8"

Weight: 3400 g • 119.9 oz

738051 - OpenFire Pan Large

Dimensions: 470 x 760 x 250 mm • 18.5" x 29.9" x 9.8"

Weight: 4400 g • 155.2 oz

OPEN FIRE SPATULA

Generously sized spatula for outdoor cooking. A flexible stainless steel blade and an oak handle ensure usability and durability. Perfect for the OpenFire pans and Kamoto fire pit.

Part no: 738052

Dimensions: 400 x 55 x 40 mm • 15.7" x 2.2" x 1.6" Weight: 140 g • 4.9 oz

OPEN FIRE PACK SACK

The OpenFire Sack with its coated inside is a convenient accessory for carrying and storing the OpenFire Pans and the Kamoto Fire Pit. Use it to carry your dirty fire pit or pan home without ruining your clothes or car. Back home you simply turn it inside out and rinse it off. Made in durable nylon with a pu-coated inside.

Dimensions: 490 x 70 x 770 mm • 19.3" x 2.8" x 30.3" Weight: 570 g • 20.1 oz

CAMPFIRE TONGS

A pair of tongs made of stainless knife steel, which is sturdy yet, flexible and will give you great control at the grill. The cutout pattern gives you a great grip even when tongs are wet or greasy.

The 275 mm length is compact enough for bringing them with you wherever you want your barbecue. Still it's long enough to keep your hands out of the

Jagged and narrow endings give a good grip and control.

Part number: 741090

Dimensions: 275 x 26x 83 mm • 10.8" x 1" x 3.3" Weight: 133 g • 4.7 oz

CAMPFIRE APRON

Protect your clothes from grease and soot while showing off for your friends in style. Made from durable g1000-fabric. Two larger front pockets and one smaller breast pocket for all the essentials you need while cooking. Adjustable belt made of webbing keeps the apron in place. The buckle has an integrated bottle opener in stainless steel.

Part number: 740960

Dimensions: 800 x 630 mm • 31.5" x 24.8" Weight: 140 g • 4.9 oz

CAMPFIRE COOKSET - LARGE

Durable 18/8 stainless steel Primus cookset - a genuine workhorse designed to withstand years and years of service. The set consists of two pots (1,8 and 3,0 L), two lids with integrated colanders and a frying pan with an integral handle. The large pot (3.0 litres) has a foldaway handle and can be suspended over an open fire. Also the frying pan has a foldaway handle and aluminium-clad bottom for an even heat distribution. Both the stackable pots and the frying pan packs compactly into an included storage bag.

Part number: 738001

ESSENTIAL POT SET

A great starter kit consisting of two aluminium pots that neatly packs in to each other making a compact and rattle-free unit, a frying pan in hard anodized aluminum with non-stick coating that doubles as a lid and a pot gripper.

The Essential Pot Sets are available in two sizes 1.3L for 1-3 people and 2.3L for 2-5 people.

Part number:

740290 - Essential Pot Set 1.3L Volume: 1.3 I • 43.9 oz Dimensions: Ø 198 mm x 79 mm • 7.8" x 3.1" Weight: 503 g • 17.7 oz 740300 - Essential Pot Set 2.3L Volume: 2.3 I • 77.7 oz Dimensions: Ø 221 (base) x 107 mm • 8.7" x 4.2" Weight: 662 g • 23.4 oz

PRIMETECH™ POT SET

The PrimeTech pots are designed with efficiency in mind, making the best out of every ounce of fuel used. Thanks to an integrated heat exchanger in the bottom of the pot efficiency is increased with 50 % compared to conventional pots. That means your water will boil faster and your fuel will last longer. The PrimeTech pot is made from durable hard hard-ano-dized aluminum and features a ceramic non-stick coating on the inside making cooking and cleaning easy. The lid, made from transparent Tritan® has an integrated colander, perfect when draining pasta water. The second pot in this kit is made of hard anodized aluminum and doesn't have heat exchanger. Besides the ordinary duties it can be used as a serving bowl and it protects the ceramic coating of the PrimTech pot when packed together.

The PrimeTech Pot Set consists of:

- · One PrimeTech pot with heat exchanger
- One hard anodized pot
- A self locking pot gripper
- A storage bag

48 Primus Workbook 2018

2.3 L

CAMPFIRE GRIDDLE PLATE

A griddle plate made from die casted aluminium for even heat distribution. The non stick surface serves convenient grilling and easy cleaning. Designed to drain fat from the food to give that grilled surface. Fits Tupike stove and most other two burner stoves.

Part number: 738018 — Campfire Griddle Plate Dimensions: 190 x 170 x 10 mm • 75" x 6.7" x 0.4" Weight: 900 g • 3.7 oz

CRIMP POT GRIPPER

This smart pot gripper has the sturdiness of a fixed handle and the flexibility of a traditional pot gripper. It locks safely to the pot, making it both easier and safer to cook. With one simple push it releases and can be used for other pots.

Part number: 740400

Dimensions: 140 x 36 x 44 mm • 5.5" x 1.4" x 1.7" Weight: 85 g • 3 oz

POT GRIPPER

Aluminium pot gripper for Primus pans. With protection to avoid damaging the "non-stick" surface of the pots.

Part number: 731760

Dimensions: 130 x 39 x 42 mm • 5.1" x 1.5" x 1.6" Weight: 45 g • 1.6 oz

SALT AND PEPPER MILL - PACK OF 2

Give your outdoor cooking some extra flavour. A set of a salt and pepper mill made of durable aluminum. Easy to operate with just one hand.

Part number: 740630

Dimensions: Ø 27 x 52 mm • Ø 6" x 1.1" Weight: 84g • 3 oz

LEISURE CUTLERY KIT - FASHION

Spoon, knife and fork made of high-quality stainless steel, with a design that make them lighter. The cutlery is held together with a holder made of heat-resistant silicone that is easy to grip. Display box includes blue (737891), green (737892), pink (737893), purple (737894), orange (737895) and yellow (737896). Sold in packs of 24 only.

Part number:

735440 – Leisure cutlery kit (display box incl. 24 pcs) Dimensions:182 x 37 x 16 mm • 7.2" x 1.5" x 0.6" Weight: 80 g • 2.8 oz

LEISURE CUTLERY KIT - TITANIUM

Leisure is a stylish cutlery kit, which includes a spoon, knife and fork made of ultralight titanium, weighing no more than 51 grams. The cutlery is held together with a heat-resistant silicone holder and is easily packed in your backpack without taking too much space. The holder doesn't conduct heat and makes the utensils easy to grip.

Part number:

737140 - Red 737147 - Green

Dimensions: 182 x 37 x 16 mm • 7.2" x 1.5" x 0.6" Weight: 51 g • 1.8 oz

CAMPFIRE CUTLERY SET

Cutlery Set in 18/8 stainless steel including knife, fork and spoon. All packs up tight and compact and the leather sleeve makes sure everything is kept in one place.

Part number: 738017

Dimensions: 185 x 40 mm • 7.3" x 1.6" Weight: 80 g • 2.8 oz

FOLDING SPORK

Lightweight spork made of PC-plastic in folding design. An all-around eating utensil that is compact, ultralight, and easy to carry anywhere. Perfect for backpackers, adventurers, and anyone who needs lightweight utensils.

Part number:

740640 – Black **740650** – Barn red

740650 - Barn 740660 - Blue

740660 - Blue 740670 - Moss

740680 – Tangerine

Dimensions: 105 x 40 x 23 mm • 4.1" x 1.6" x 0.9' Weight: 10.5 g • 0.35 oz.

LIGHTWEIGHT TRAILCUTLERY TRITAN®

Fork, knife and spoon in BPA-free Tritan® plastic. Feather weight utensils with a strap that keep the pieces organized.

Part number:

740580 - Black

TRAILBREAK EX VACUUM BOTTLE

Rugged expedition bottle. TrailBreak EX vacuum insulated bottles are made from high grade stainless steel making them rugged and durable. A silicone sleeve improves the grip and prevents cold fingers or possibly frostbite in case you would touch the steel in very cold conditions. It also offers extra protection to the bottle. The cup is made from double walled stainless steel to keep the beverage hot or cold and also serves as extra protection of the stopper. TrailBreak EX is delivered with two stoppers. One regular stopper for maximum temperature retention and one ClickClose-stopper. The Click-Close-stopper also doubles as a drinking stopper, making it possible to drink directly from the bottle. It can be disassembled entirely making the stopper easy to clean. The wide mouth makes filling and also cleaning of the bottle easier.

TrailBreak is available in two sizes: 0.75 L and 1.0 L, and four colors: Coal, Tangerine, Barn Red and Moss.

TRAILBREAK LUNCH JUG

TrailBreak Lunch Jugs have double walled vacuum insulated construction in stainless steel making them rugged and durable. The powder coating on the outside – available in four colors – provides a grippy surface. May it be for the kids in the kindergarten, a quick lunch in the office or a hot stew when ski touring – a hot meal is better food than just a cold snack, especially in the winter when it's important to keep warm. The wide mouth opening makes it easy to fill, to eat from and to clean after use. A benefit with Stainless steel is that it doesn't retain or impart flavors.

Available in two sizes: 400 ml (13.5 oz) and 550 ml (18.6 oz) and four colours: Black, Yellow, Red and Blue.

Part number:

737943 - Black

NEW

COOLER

The Cooler is an insulated variant of our Utility Sack, perfect for the smaller adventure or to be stowed in your backpack. Fill it with ice or use the Ice Pack to keep your food or beverage cold. The roll-top opening makes it easy to seal the bag tight and also doubles as a handle. The buckle has an integrated bottle opener, which comes in handy when serving drinks. Webbing with loops makes it easy to fasten to your backpack.

Outer fabric in nylon makes the backpack rugged and durable, perfect for the adventuring wear and tear. The inside lining is made of waterproof PU-coated polyester and can be turned inside out for easy cleaning. Additionally, the bag is insulated with EVA foam, which keeps the inside of the backpack cold as well as it gives some rigidity to the bag to make it stand stable on the ground. The Cooler is perfect for serving cold beverages from and great to bring in the backpack, car, boat or kayak.

A 10 L capacity holds enough food for the short adventure while it is still small enough to conveniently be stowed away during transport.

Part number: 740740

Volume:10 I • 6.8 oz Dimensions: 300 x 300 x 300 mm • 11,8" x 11.8" x 11.8" Weight: 475 g • 16.7 oz

COOLER BACKPACK

The cooler backpack is an insulated backpack for all your favorite camping food. Fill it with ice or use the Ice Pack to keep your food or beverage cold. The roll-top opening makes it easy to close and open, a buckle (with a handy integrated bottle-opener) secures the content in the bag.

Outer fabric in nylon makes the backpack rugged and durable. The inside lining is made of waterproof PU-coated polyester, which can be turned inside out for easy cleaning. Insulation in EVA foam keeps the inside of the backpack cold while providing padding for your back and makes it comfortable to wear. The backpack is equipped with adjustable 30 mm shoulder straps for comfortable.

The backpack is equipped with adjustable 30 mm shoulder straps for comfortable carrying. A smaller pocket will fit your kitchen accessories or hold your old bottle caps. The 22 L pack easily holds food for you and your friends. It has space for four 6-packs of longnecks or a couple of BIBs.

The perfect companion for your outdoor adventure.

Pat number: 740750

Volume: 22 I • 74.4 oz Dimensions: 450 x 200 x 300 mm • 17.7" x 7.9"x 11.8" Weight: 800 g • 28.2 oz

ICE PACK

A smaller roll-top bag made of PU-coated polyester to be filled with ice and used in combination with the Cooler bags. Being waterproof it keeps the food from getting wet from melting ice. The Ice Pack is also perfect as a waterproof pack bag, either when returning from the campsite or on its own.

Part number: 740760

Volume: 2 I • 6.8 oz Dimensions: 200 x 220 x 80 mm • 7.9" x 8.7" x 3.1" Weight: 35 g • 1.2 oz

CAMPFIRE UTILITY SACK

This versatile bag will make camp life easier. Thanks to a watertight roll top and a coated inside it's completely sealed and easy to clean. Use it to bring food or carry water in. On your way home you can carry trash or used cutlery and plates without ruining your pack. The bag is made from durable nylon and has 8 Liter capacity.

Part number: 738010

Volume: 8 I / 270.4 oz Dimensions: Ø 290 x 400 mm • Ø 11" x 16" Weight: 275 g •9.7 oz

CAMPFIRE TABLE

The 7075 aluminum frame and the reinforced polycotton fabric top makes this table a sturdy surface to prepare your food and to eat from. The foldable construction makes it small when stored and guick to set up. The table top can be strapped from the reinforcements and washed in a washing machine.

Part number: 741080

Dimensions: 580 x 580 x 750 mm • 22.8" x 22.8" x 29.5" Weight: 1700 g • 59.9 Max load: 25 kg • 55.1 lb

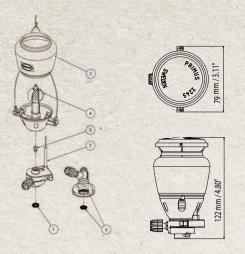

CAMPFIRE STOOL

A foldable stool with a frame made of 7075 aluminum and an insulated, warming seat in polycotton fabric - simplicity and comfort combined. The stool takes up little space in the backpack and is quickly unfolded to relieve tired backs and legs. The attached webbing makes it easy to wrap the folded stool, locking it in space with a buckle, which also combines as a bottle opener.

Part number: 741070

EASY LIGHT

LIGHT AND WARMTH - ANYWHERE

The Easy Light spreads light and warmth and takes up no more space than a medium-sized orange in your backpack. The lantern is equipped with a piezo igniter and a patented, almost noiseless burner and has a continuously adjustable brightness corresponding to a maximum of 490 lumens. The version with a Duo valve fits most gas cartridges with a valve on the market. The perfect lantern for the global traveler. The EasyLight is also available with the standard threaded connection, made of corrosion and maintenance-free materials and comes in a durable plastic box.

MICRON LANTERN

A BRIGHTER FUTURE

The Micron Lantern is a compact, lightweight and durable lantern that provides light and warmth when you need small dimensions, low weight and durability. It's available in two versions: with a stainless steel mesh or in frosted glass. The stainless mesh is more durable, of course, whereas the glass version provides a more powerful light. Brightness is infinitely adjustable, up to 235 lumens on the steel mesh version and 360 lumens on the glass version. Two of the lantern's most important features are patented. The EasyTrigger™ ignition system which allows for quick and easy lighting and the burner which ensures that the lantern is virtually silent and uses little gas. The steel mesh lantern is supplied with a nylon stuff sack, and the glass version comes in a sturdy plastic case.

FIRESTARTER

LIGHT YOUR FIRE

The easiest way to start a fire is with great heat and great power. This also has the advantage of giving good combustion from the very start and avoiding the use of chemical fire starters, which makes this method more environmental friendly than most other lighting methods. Easy to use thanks to its built in piezo-igniter and in extreme conditions, it can even be turned upside-down and using gas in its liquid form, which makes it possible to run in cold weather. This FireStarter fits all PRIMUS PowerGas cartridges which gives the best output in all conditions.

POWERLIGHTER

Primus PowerLighter with a narrow flame makes it simple to light your stove or camp fire. A temperature of 1300°C facilitates lighting liquid fuels in bad weather.

733307 - Black 733308 - Red

Dimensions: 80 x 50 x 20 mm • 3.1" x 2" x 0.8"

IGNITION STEEL

The optimal way of starting a fire or lighting your stove in all weather conditions. Water resistant – works in rain and snow. Durable – can be used thousands of times. Effective – the sparks are about 3000°C.

Part number:

733331 - Small 732391 - Medium 732401 - Large

Dimensions

S: Ø 22 x 67 mm • 0.9" x 2.6" M: Ø 24 x 78 mm • 0.9" x 3.1" L: Ø 24 x 100 mm • 0.9" x 3.9"

Weight: 22 g • 0.8 oz./ 26 g • 0.9 oz / 50 g • 1.8 oz

FILLING ADAPTER

This product can easily be connected to the PowerGas single use gas cartridges. The filling adapter can be used to fill PowerLighter and other refillable lighters.

Part number: 733870

Dimensions: Ø 15 x 40 mm • 0.6" x 1.6" Weight: 19 g • 0.7 oz

FOOT REST

Recommended to increase stability for stoves that screw directly onto the gas cartridge, especially when using large pots or cooking on uneven surfaces. The footrest attaches to the base of the cartridge. Also fits other brand cartridges.

Part number: 721171

Dimensions: 27 x 140 x 37 mm • 1.1" x 5.5" x 1.5" Weight: 22 g • 0.8 oz

STOVE PAW TI

Base plate for Primus stoves. Stove Paw Ti is an essential accessory for hose mounted stoves when used on soft or uneven surfaces like snow, sand or gravel. It increases the footprint of the stove thus making it stand more stable and safe. It is made of titanium making the StovePaw Ti light and durable. The stove's feet clip into special slots in the plate, attaching them securely. The Stove Paw fits Primus' OmniFuel, MultiFuel, OmniLite Ti, EasyFuel, Express Spider and some other stoves with three feet.

Part number: 721230

Dimensions: 120 x 110 x 10 mm • 4.7" x 4.3" x 0.4" Weight: 55 g • 1.9 oz

WINDSCREEN **AND HEAT REFLECTOR SET**

For OmniFuel, MultiFuel, Gravity, VariFuel, EasyFuel and Express Spider stoves. Increases heat output and shortens cooking time. The aluminium heat reflector focuses heat on the pot and preheating coil.

Part number: 721720

Dimensions: Wind screen 750 x 150 mm • 29.5" x 5.9", Heat reflector Ø 250 mm Weight: 87 g • 3.1 oz

EXPEDITION BOX

A hardcore aluminium stove box for base camp, car adventures or where ever two Primus stoves shall be used with only one fuel bottle or gas cartridge. A robust adapter is included. Easily folds down to a compact case which protects the stoves and fuel bottle.

Part number: 734730

Dimensions: 420 x 220 x 90 mm • 16.5" x 8.7" x 3.5" Weight: 1.7 kg • 60 oz

SUSPENSION KIT

For those who want to take a break on the mountainside or cook on board a boat. The wires hold the stove and gas cartridge or fuel bottle together, but are separated at the top for easier access to pots and pans. Available in two versions for stoves with three or four legs.

Part number:

721220 – For a stove with three legs Dimensions: 170 x 170 mm • 6.7" x 6.7" Weight: 50 g • 1.8 oz 733320 - For a stove with four legs. Dimensions: 140 x 140 mm • 5.5" x 5.5" Weight: 65 g • 2.2 oz

MULTI TOOL

For OmniLite Ti, OmniFuel, MultiFuel, MultiFuel EX, Gravity and EtaPower.

731860 - For OmniLite Ti, OmniFuel and MultiFuel. With jet cleaner Dimensions: 80 x 17 x 15 mm • 3.1" x 0.7" x 0.6"

Weight: 42 g • 1.5 oz. 733930 - For MultiFuel EX.

Dimensions: 88 x 19 x 5 mm • 3.5" x 0.7"

Weight: 16 q • 0.5 oz.

732940 – For Gravity och EtaPower. With jet cleaner. Dimensions: 88 x 19 x 5 mm • 3.5" x 0.7" x 0.2"

Weight: 17 g • 0.6 oz

732940

LOKE HEATER

Primus's infrared heater has a high output and can maintain a comfortable temperature for a long time. Its practical design allows you to use the same gas cylinder you use with your camping stove. The output can be continuously adjusted from 0 to 2500 W. Loke fits Primus and Campingaz® refillable gas cylinders.

Part number: 233801

Dimensions: 275 x 190 x 150 mm • 18.8" x 7.5" x 5.9" Weight: 640 g • 22.6 oz.

BIFROST H4 & H6

Primus Bifrost H4 and H6 are roomy tents with sleeping space for 4-6 people and a standing height to fit most people. The space creates a great feeling of having a living room between the two sleeping compartments. Ventilation openings and mosquito netting keep the moisture and mosquitoes away. Aluminium arch supports provide good stability, and colour coding makes set-up quick and convenient. A perfect tent for any number of purposes, including camping, paddling, sailing, or why not even an extra room in the backyard? The outer tent is made of PU Coated Polyester and can handle a 3000 mm water column. The inner tent is made of Oxford Polyester and the floor fabric can handle a 7000 mm water column. The tent is equipped with storm guy lines. The tents have privacy windows and a floor that can easily be snapped into place between the sleeping compartments. They also come with poles that allow you to raise the door for rain protection or a shady spot outside the tent.

Part number:

421002 - H4

Dimensions: 3400 x 2100 x 1900 mm • 133.8" x 82.6" x 74.8"

Weight: 9.3 kg • 20.2 lbs

422002 – H6

Dimensions: 6100 x 2300 x 2000 mm

• 240" x 90.5" x 78.7"

Weight: 10.7 kg • 23.5 lbs

BIFROST Y6

The Bifrost Y6 is our roomiest tent with two separate sleeping compartments with room for 3 people in each. The compartments are connected by a "dome" with a diameter of approx. 3 meters. The tent works well for a group of people under one roof that wants a larger space to move around in. The outer tent is made of PU Coated Polyester and the floor fabric can handle a 3000 mm water column. The inner tent is made of Oxford Polyester and can handle a 7000 mm water column. The tent is equipped with storm guy lines. The tents have privacy windows and a floor that can easily be snapped into place between the sleeping compartments. They also come with poles that allow you to raise the door for rain protection or a shady spot outside the tent.

Part number: 423002

Dimensions: 2950 x 3000 x 700 mm • 116.1" x 118" x 27.5"

Weight: 12 kg • 26.5 lbs

BIFROST EVENT

Bifrost Event is a tent that does not have an inner tent. It is suitable not only for exhibitions and other events, but also when you need to have a large space under cover. There is enough room to entertain 10-15 people. You put up the tent using four aluminium arch supports. It has 12 equipment hangers on the inside of the tent. The tent has taped seams, is made of PU Coated Polyester and can handle a 3,000 mm water column. The tent has 22 attachments on the outside for storm guy lines. It also comes with poles that allow you to raise the door for rain protection or to provide a shady spot outside the tent. The maximum standing height is 210 cm. Reparation kit is included.

Dimensions: 4500 x 2500 x 2100 mm • 177.1" x 98.4" x 82.6"

Weight: 5.9 kg • 13 lbs

SHELTER

This scaled-down tent can be used as protection against rain, wind, and sun. The opening is equipped with a mosquito net that can easily be tucked away at the lower edge. Pouches sewn in around the floor can be filled with sand or stone so that the tent stays put even in the wind. The tent can handle a 3000 mm water column, and the floor fabric can handle a 7000 mm water column. Comes with color-coded arch supports, storm guy lines and stakes.

Part number: 425010

Dimensions: 2500 x 1000 x 1200 mm • 98.4" x 39.3" x 47.2"

Weight: 1.5 kg • 3.3 lbs

TARP & TARP LW

This combined sun and rain protection works well as a compliment to Primus's tents. It can also be used separately or between tents or likewise to increase spaces for socializing outdoors. Available in two varieties: with the tent canvas and ropes only to make every gram count or complete with ropes and poles.

Part number:

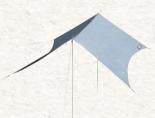

426010 - with poles Dimensions: 3000 x 3000 x 2300 mm • 118" x 118" x 90.5"

Weight: 1.5 kg • 3.3 lbs

426020 - LW. without poles

Dimensions: 3000 x 3000 x 2300 mm • 118" x 118" x 90.5"

Weight: 650 g • 23 oz

PRIMUS GAS

Primus has gas for all seasons and purposes. We offer three different gas mixtures for different conditions: Summer Gas, Power Gas and Winter Gas, in order to optimize the energy and effectiveness when and where you need it.

Power Gas is our most versatile blend, delivering excellent power even around zero degrees Celsius. Summer Gas is optimized for maximum fuel efficiency in hot conditions up to temperatures to 40 ° C. For cold temperatures, we have created Winter Gas that works effectively down to -22 ° C.

PRIMUS POWER GAS™

CHOOSE CO. NEUTRAL GAS

Primus Gas is our carbon dioxide neutral fuel. To offset carbon dioxide emissions from the gas and the metal cartridge, we support the Darkwoods Forest project that is managed by Nature Conservancy of Canada (NCC) and the Forest Carbon Group. Darkwoods, one of the most biologically diverse and oldest forests in Canada, is now a permanently protected conservation area thanks to the project. It is the largest project in Canada's history and covers 55,000 hectares that include 17 watersheds, 50 lakes and a stand of western red cedar more than 600 years old. Unlike several neighbouring forests, Darkwoods is no longer threatened by deforestation. By preventing deforestation and introducing sustainable forest management, which include replantation of trees, the CO2 storage capacity increases. As trees capture CO2, the net balance of CO2 emissions from the gas is zero. The entire Darkwoods area in British Columbia is now protected and only a small part of the land is used for sustainable forestry.

220261 - Power Gas 450 g

220293 - Power Gas 450 g (US)

Gross weight: 645 a • 22.7 oz

Dimensions: Ø 108 x 137 mm • 4.2" x 5.4"

POWER GAS

Power Gas is our most versatile blend, delivering excellent power from spring to fall. Even if the temperature drops below freezing it stills provides sufficient pressure to run a stove. Its versatility makes it suitable for situations where the weather and temperature conditions are uncertain.

Part number:

220661 - Power Gas 100 g

220793 - Power Gas 230 g (US) Dimensions: Ø 108 x 85 mm • 4.2" x 3.3"

Gross weight: 390 g • 13.7 oz

SUMMER GAS

At temperatures of +15°C and above a conventional gas blend will overpower most stoves making them less efficient, resulting in higher fuel consumption than needed. Primus Summer Gas is optimized for summer conditions and temperatures close to +40° C and thus, the gas will stay efficient even in really hot conditions.

WINTER GAS

Gas that works down to -22°. Everybody who has used a gas cartridge stove in cold conditions knows this: the lower the temperature, the poorer the performance of the stove. In cold conditions the cartridge pressure decreases under use making the stove run with less power or not at all. Even though the cartridge might have fuel left in it! Why? Liquefied gas doesn't evaporate properly the colder it gets.

HOW DOES IT WORK?

The main innovation behind Primus Winter Gas cold weather performance is the Vapour Mesh™ a highly absorbent paper inside the cartridge that will keep the pressure higher making the stove run better. The VaporMesh increases the surface on which the liquid fuel can evaporate into gas state. The increased surface makes the change from Liquid to gas faster and the speed of this process is what determines the pressure inside the cartridge. Compared to conventional cartridges this makes it work in conditions when it was previously hard to use gas fuels.

IN COMPARISON

VAPORMESH

in its liquid form.

the gas container.

REDUCED BOILINGTIME

A type of paper that absorbs the gas

WIDER SURFACE - INCREASED PRESSURE

the phase transition from liquid to gas is faster.

the boiling time in low temperatures becomes

shorter compared to other gas canisters.

When comparing two totally new, full cartridges (one of our old Power Gas and one Winter gas) the difference is not very notable since the pressure is high in both but as the fuel inside the cartridge is consumed the difference becomes more and more evident. With "normal" cartridges in cold conditions the canister pressure decreases under use, making the stove run with less power or not at all. This is obvious when using a cartridge that is not full. After using a cartridge for 60 minutes of cooking, a Winter Gas cartridge is approximately 9 % more powerful than one without VaporMesh™. After 120 minutes of use it delivers about 15 % more power.

LIQUID GAS

Isobutane & Propane

SMOOTHER PERFORMANCE

Primus Winter Gas delivers a smoother performance during the lifetime of the gas canister.

SUMMER PIERCEABLE GAS - WITHOUT VALVE

The Primus single-use pierceable cartridge contains 190 g butane/propane mix. Available only in packs of 36.

Part number: 221051

Dimensions: Ø 90 x 90 mm • 3.5" x 3.5" Gross weight: 375 g • 13.2 oz

CASSETTE GAS

Contains 220 g (7.7 oz) butane. Cartridges are equipped with self-sealing, safety valves and bayonet joint. Available only in packs of 28.

Part number: 220851

Dimensions: Ø 65 x 200 mm • 2.6" x 7.9" Gross weight: 325 g • 11.4 oz

ALLROUND GAS

Butane gas for refilling gas lighters. The cap includes five different nozzles. Available only in packs of 12.

Part number: 720061

Dimensions: Ø 52 x 182 mm • 2" x 7.1" Volume: 290 ml • 9.8 oz Gross weight: 214 g • 7.5 oz

POWER FUEL

Contains naphtha.

Part number: 220994

Volume: 1 | • 33.8 oz Dimensions: Ø 83 x 240 mm • 3.3" x 9.4" Weight: 690 q • 24.3 oz

FUEL BOTTLE

Ultra light fuel bottle of seamless extruded aluminium and lacquered inside to give the bottle better protection. The connection threads are standard and suitable for OmniLite Ti, OmniFuel, MultiFuel, VariFuel, Gravity VF & MF and EtaPower MF.

LEAK SPRAY

To test the seal on gas and air systems under pressure. For use on tubing, hoses, connectors, joints, and couplings. Easy-to-see, small bubbles reveal the tiniest break in the seal. Can also be used to test refrigeration and compressed air equipment, tires and inner tubes, inflatable boats, and more. Good to have in your toolbox, car, trailer, or boat.

Part number: 888888

Dimensions: Ø 50 x 148 mm • 2" x 5.8" Weight: 84 g • 6.5 lbs

SERVICE KIT

For OmniFuel and MultiFuel. Weight: 58 g.

Part number: 731770

Weight: 58 g • 2 oz

SERVICE KIT

For OmniFuel II and MultiFuel III. Weight: 59 g.

Part number: 731771

Weight: 59 g • 2 oz

SERVICE KIT

For OmniLite Ti. Weight: 54 g.

Part number: 737280

Weight: 54 g • 1.9 oz

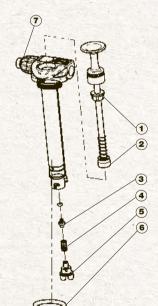

FUEL PUMP SERVICE KIT

For OmniFuel, MultiFuel and VariFuel. Spare parts for Primus fuel pumps.

Part number: 721460

Weight: 55 g • 1.9 oz.
